

Online Courses

What e-learning options does LEARN provide for Quebec's English Schools?

- Online courses offered within the school day schedule.
- A growing bank of online resources that can be accessed anytime, anywhere.
- Live online tutorials and homework help in the evenings.

The LEARN Delivery Model

LEARN uses a portal (SAKAI) and a web-based teaching platform to deliver its e-learning services. Real time, or synchronous, teaching and learning occur using Wimba Live Classroom which features multi-way audio and an interactive e-board available on the internet.

This platform is capable of delivering courses to areas that may have low bandwidth. Wimba also features archives of live lessons or pre-recorded instruction for student access anytime, anywhere.

LEARN Courses Offered for 2009-2010

Most course descriptions are available on the MELS website.

Synchronous Courses (real time)

Online delivery 4 days per week for most 4 credit courses

Online delivery 5 days per week for 6 credit courses

LEARN has established the following prerequisites:
